Evolution
by TS Booker

KEY FEATURES:

The Evolution range was introduced to meet the needs of existing clients where the TS Booker Signature range had previously been installed. The Evolution range is a value engineered solution that uses a cost effective carcass solution yet still maintains the high quality door finishes. This range has been installed in Science laboratories, Technology rooms, Art suites and offices in Schools, colleges and Universities. Previous clients have been impressed with the robustness of the full length piano door hinge and choice of colours available. The range includes many widths, heights and depth of units with shelves, drawers and tray storage available.

- Joints strengthened using threaded cross dowels and bolts
- Full length heavy duty Piano hinge
- 18 years lifecycle expectancy
